Math

Our first math chapter is on place value, addition, and subtraction to one million. We have been working on modeling place value relationships, read and writing numbers, ordering numbers, rounding numbers, and adding and subtracting whole numbers. We will also do some problem solving with these concepts.

We are so excited about our new STEAM Lab! We get to visit the STEAM Lab every Tuesday. Last week we got out the K'Nex and Sphero balls.

Reading

Our first lesson in reading goes with the story Because of Winn Dixie. We have been talking about point of view and flashbacks in this story. I'm also reading the book to the class as our read aloud, so we get to hear the whole thing and not just the excerpt in our reading books. Have your child summarize what we've read so far, it's a great book!
