

# Mrs. Foster's 6<sup>th</sup> Grade

november 2018

## Halloween Fun

## Curriculum

**6<sup>th</sup> Science** - This next week students will be working on their Performance Assessment for our Earth-Moon-Sun System project. They will create a poster, 3D model, or Diagrams to show their knowledge of Seasons, Day & Night, Rotation & Revolution, Moon Phases & Solar & Lunar Eclipses. They will work on this project at school.

**6<sup>th</sup> Grade Math** - Sixth graders are working on solving equations for variables as well as substitution of variable equivalents in expressions. We continue to have our weekly quizzes. Please encourage your child to study. If they have had corrections in the past, please help them study. We have talked about several ways to help them study. These include a study partner, flash cards (made with index cards), and spending 10 minutes a night rather than cramming in one study session.

**6<sup>th</sup> Language Arts** - We are continuing to review various types of nouns and verbs. These are very important foundational grammar skills that are imperative that students have a firm grasp on.

**6<sup>th</sup> - Novel - Number the Stars** - We are about halfway through the book. The students are really enjoying the story and learning a lot about the Germans and the Jewish People. We also discussed the tragedy in Pittsburgh, PA, and how sad it is that hate crimes against people for their religious beliefs still occurs in our society today.

## Up Coming Events

Chili Supper - November 10, 2018 @ 5:30

Please send items for our "Farm House:" Themed basket. This can include decorations, household items, or anything that can be used around the Farm House.
