

### Math

We have been working on multiplication, especially focusing on two digit by two digit multiplication. We have also been practicing fact fluency on [moby.com](http://moby.com). The kids can even practice this at home with their login.

### Reading

Last week we read a story called Jose! Born to Dance. It tells about a young man's determination to become a professional dancer. It uses descriptive language and literary devices, such as simile and metaphor, to tell about a real person's life.

4<sup>th</sup> grade had a great time at Science Day at Big Hill last week. We went to different sessions to learn about things ecosystem related. Our sessions included leaf rubbings, team building games, hiking the trails, terrariums, a boat challenge, and picking up trash. We finished the day with cookies and juice!

### 4<sup>th</sup> Grade at Science Day
