Power Pens

Our class got a Donor's Choose project funded! We got 10 sets of Power Pens and 10 sets of multiplication and division quiz cards. The Power Pens light up green or red, depending if the question was answered correctly or incorrectly. The quiz cards have multiplication and division problems with various answer bubbles. The students then have to tap the answer correctly for their pen to light up green. It has been a great way to practice our facts!

Guest Readers

If you were interested in coming to read a story to our class for our Countdown to Christmas with Reading, please let me know. We would love to have you come read to us! We have several signed up and we are excited to have them come visit.

We have been working on division in math. We started off our chapter on estimating quotients.

We then moved on to remainders and interpreting the remainder. We are now learning about division and the distributive property, how to divide using repeated subtraction, and dividing using partial quotients.
