

## Mr. Allison's News

**Reading:** The class will continue working on a lot of vocabulary and comprehension skills. Please continue to read with them at home nightly. Remember reading only helps them if they are reading it correctly. Work on pausing at commas and stopping at periods.

**Science:** We are Working on Forces and Motion. This is a big chapter for our class. They will learn about speed, distance, gravity, and friction to name a few. The bottle race cars will really help reinforce this concept. Remember to send any pop bottles you have.

**Math:** We continue to work on division. We have learned several strategies to divide and will continue to use them daily. Please keep reviewing basic facts at home in order to keep them fresh. These facts will make learning multiplication and division much easier.

**Note:** Please continue to check your child's planner. Their color will be in it

each night. They will also list objectives and upcoming events in it.

### Specials: 2nd Semester
