

Math

We have been working on multiplication, especially focusing on two digit by two digit multiplication. We have also been practicing fact fluency on moby.com. The kids can even practice this at home with their login. Their logins can be found in the front of their planner!

Reading

This week we read a story called Jose! Born to Dance. It tells about a young man's determination to become a professional dancer. It uses descriptive language and literary devices, such as simile and metaphor, to tell about a real person's life.

4th grade has a big week next week with field trips. On Wednesday we will be going to the VFW in Parsons. Students do **not** need to bring a lunch on Wednesday as the VFW provides lunch. They do need to **bring \$3** for a Braum's stop after the VFW. We will also play in the park that afternoon before heading back to school.

Thursday we will be going to the high school in Altamont to visit the Drama Department. We will only be gone for part of the day for this trip. You **do** need to send a lunch this day as we won't be back in time for school lunch. We are looking forward to these educational trips!

4th Grade Halloween Parade
