

## Division

We are currently finishing up our division chapter in our Big Ideas math books. Our next chapter has to do with factors, multiples, and patterns. We will be able to find factors of a number, explain the differences between factors and multiples, and apply strategies to show relationships in numbers and shapes.

## Language Arts

This week our story is called *Ecology for Kids*. It is in the informational text genre. We will be looking at the author's word choice this week, along with analyzing an argument. We will be using context clues to help with vocabulary words. Our vocabulary words this week are: organisms, directly, affect, traces, vast, habitats, variety, species, banned, and radiation.
