April

 **Be Ready**

 **Be Respectful**

 **Be Responsible**

April is a busy month for 4th graders! We have our **reading state assessments** on April 11 and 12, followed by **math state assessments** on April 19 and 20. We have started practicing on the program used for the assessments called Kite. We have practiced using the different tools provided such as digital highlighters, strikers, search tools, etc. Fourth grade will also do a **social studies state assessment**. This will be more project based. The students will research, write, and create a small "parade float" about a state of their choice. We have already started working on this project as well.

We will be going to **Greenbush** on Wednesday, April 5. Our class will learn about the structures and functions of plants and animals. Please remember to send a sack lunch and drink!

Reminder: Please send **12 candy/small toy filled Easter eggs** any time between now and our Easter party on Thursday, April 6. No school Friday, April 7.

Farm Bureau Earth Day

4th grade will be visiting Parsons on Tuesday, April 18 to learn about different agriculture related topics. Farm Bureau sponsors this event. We will rotate through different stations throughout the day, weather permitting. Please send a sack lunch and drink this day!

We just finished a chapter in math titled "Understand Measurement Equivalence." We worked on solving problems involving measurement, along with conversion of measurements. We also worked on representing and interpreting data with line plots.
