Math

Our first math chapter is on place value concepts. This chapter is spent working on defining the value of a number, explaining how to use symbols to compare two numbers, comparing the value of two identical digits in a number, and reading/writing multi-digit numbers in multiple forms.

We are so excited to be using our STEAM Lab again this year! We get to do STEAM activities every Thursday. We have some fun things planned this year!

Reading

We have been enjoying our new reading curriculum, HMH Into Reading. Our school year started off with the text *Flora & Ulysses*. We discussed author's purpose, text and graphic features, along with figurative language. Next week we will focus on elements of poetry, point of view, and characters. We will read realistic fiction *The Year of the Rat*.

Back to School Picture 😊
