

# 2nd Grade News

## April Events

- 19th-No school
- 22nd-Spring Music Program

## Reminders

Summer school - If you would like your child to participate in summer school, please return the summer school form to school asap.

- If you need another form send a note and I will send it home.

March was a busy month, we have been learning all about plants, graphs, and coins.

We got to do some research on plants and did multiple experiments like dissecting seeds. We have learned the parts of plants and flowers. Then we discovered why pollinators are so important.

We analyzed text features and will be working to create our own.

In April. students are going to be learning about life cycles as we study chickens. We will be studying biology and learning the 5 main animal groups.

They will also be introduced to fractions and creating 3D
