

Classroom News

April

Be Ready

Be Respectful

Be Responsible

-April is a busy month for 4th graders! We have our **reading state assessments** on April 2 and 3, followed by **math state assessments** on April 15 and 16.

We have started practicing on the program used for the assessments called Kite. We have practiced using the different tools provided such as digital highlighters, strikers, search tools, etc. Fourth grade will also do a **social studies state assessment**. This will be more project based. The students will research, write, and create a small "parade float" about a state of their choice. We will soon start working on this project as well.

-No school Friday, April 19.

-Spring Concert April 22.

-We will be going to Coffeyville for the NASA tour on Friday, April 26. More information on this to come soon!

Farm Bureau Earth Day

4th grade will be visiting Parsons on Wednesday, April 17 to learn about different agriculture related topics. Farm Bureau sponsors this event. We will rotate through different stations throughout the day, weather permitting. Please send a sack lunch and drink this day!

We just finished a chapter in math titled "Understand Measurement Equivalence." We worked on solving problems involving measurement, along with conversion of measurements. We also worked on representing and interpreting data with line plots.
